Dear Mr. Hamilton:

Davidson Cable TV of SC, Inc., is a cable and internet service provider. We are in the process of upgrading our services to offer phone packages to our customers. The main concern of our customers is that they be able to maintain their current phone numbers.

Their phone provider is Hargray Communications and they are now offering video services over their phone lines to our customers.

They are protecting their phone numbers, not allowing customers to retain phone numbers they have had for years. This is an unbalanced advantage in this market.

We understand that numbers are able to be ported (transferred) from one carrier to another. However at present, Hargray is not allowing this to occur.

Time is of the essence in this matter and we desire a response from your agency at it's earliest convenience.

If you are in need of any additional information, please call 843-705-2027.

Sincerely,

William Harvey
General Manager
